

Piedmont Radiology

Scheduling Patient Consultations

Documents Needed

For Uterine Artery Embolization (UAE):

1. Your most recent Pap smear pathology report less than a year old.
2. Your most recent imaging report that documents your fibroids (ultrasound or MRI). If your imaging is from somewhere other than Piedmont or Piedmont Fayette Hospital, you need to drop off or mail the disk or films prior to scheduling.
3. Your most recent physician's office notes (a few visits) that document your fibroids and the treatment plans you have employed.
4. The front and back of your insurance cards (blown up if possible).
5. If you have had an endometrial biopsy, the pathology report.
6. If your insurance company requires it, a referral from your physician.

For Transabdominal Chemoembolization (TACE), Transjugular Intrahepatic Portosystemic Shunt (TIPS), SirSphere, Therasphere, Kyphoplasty, Vertebroplasty, Radiofrequency Ablation (RFA):

1. Your most recent imaging report that documents your problem (ultrasound, CT or MRI). If your imaging is from somewhere other than Piedmont or Piedmont Fayette Hospital, you need to drop off or mail the disk or films prior to scheduling.
2. Your most recent physician's office notes (a few visits) that document your problem and the treatment plans you have employed.
3. Current labwork less than 30 days old.
4. The front and back of your insurance cards (blown up if possible).
5. If your insurance company requires it, a referral from your physician.
